

EAGLE

FLUORESCENT EXPOSURE TABLE

www.tmiscreenprinting.com

- + Fast perfect exposures
- + Easy to operate
- + Low power consumption
- + Comes with stand
- + Saves space
- + Doubles as light table
- + Inexpensive UV tubes
- + Live rubber blanket
- + Quick drawdown
- + Quiet Vacuum Pump
- + Comes in sizes 39"x49", 47"x57", 59"x70"

The TMI Eagle fluorescent tube vacuum exposing table gives printers an affordable space efficient all-in-one solution to screen making. Low power consumption, inexpensive and long lasting fluorescent tubes and ease of operation make this unit the best choice for growing graphic and textile shops, schools, or art printers.

Enjoy big cost savings over point light source halogen units with their exotic expensive bulbs and 220v appetites for electricity. Fluorescent tubes are 'instant on' and expose photostencils quickly due to their proximity to the emulsion. Both distance from the glass and bulb spacing has been fine tuned to provide the most even exposure over the entire frame. Live rubber blanket and whisper quiet vacuum pump provide fast drawdown, with individual controls for backlight, vacuum, UV light, and variable timer.

All fluorescent units use locally available commercial UV tubes in different quantities and sizes. Powered by regular wall current. Ships complete with sturdy base. Please note glass must be sourced and installed locally due to risk of shipping breakage. Some models available with vacuum table print tops – converts your exposing table into a medium format graphic screen press in minutes.
